

Make it clearer

Michael Colaresi

Recipe

- Title of the recipe
 - Example: potato and carrot curry
- Ingredients
 - Example: curry powder, onion, potatoes, carrots, etc
- Steps
 - Example: brown onions, then add curry powder, etc

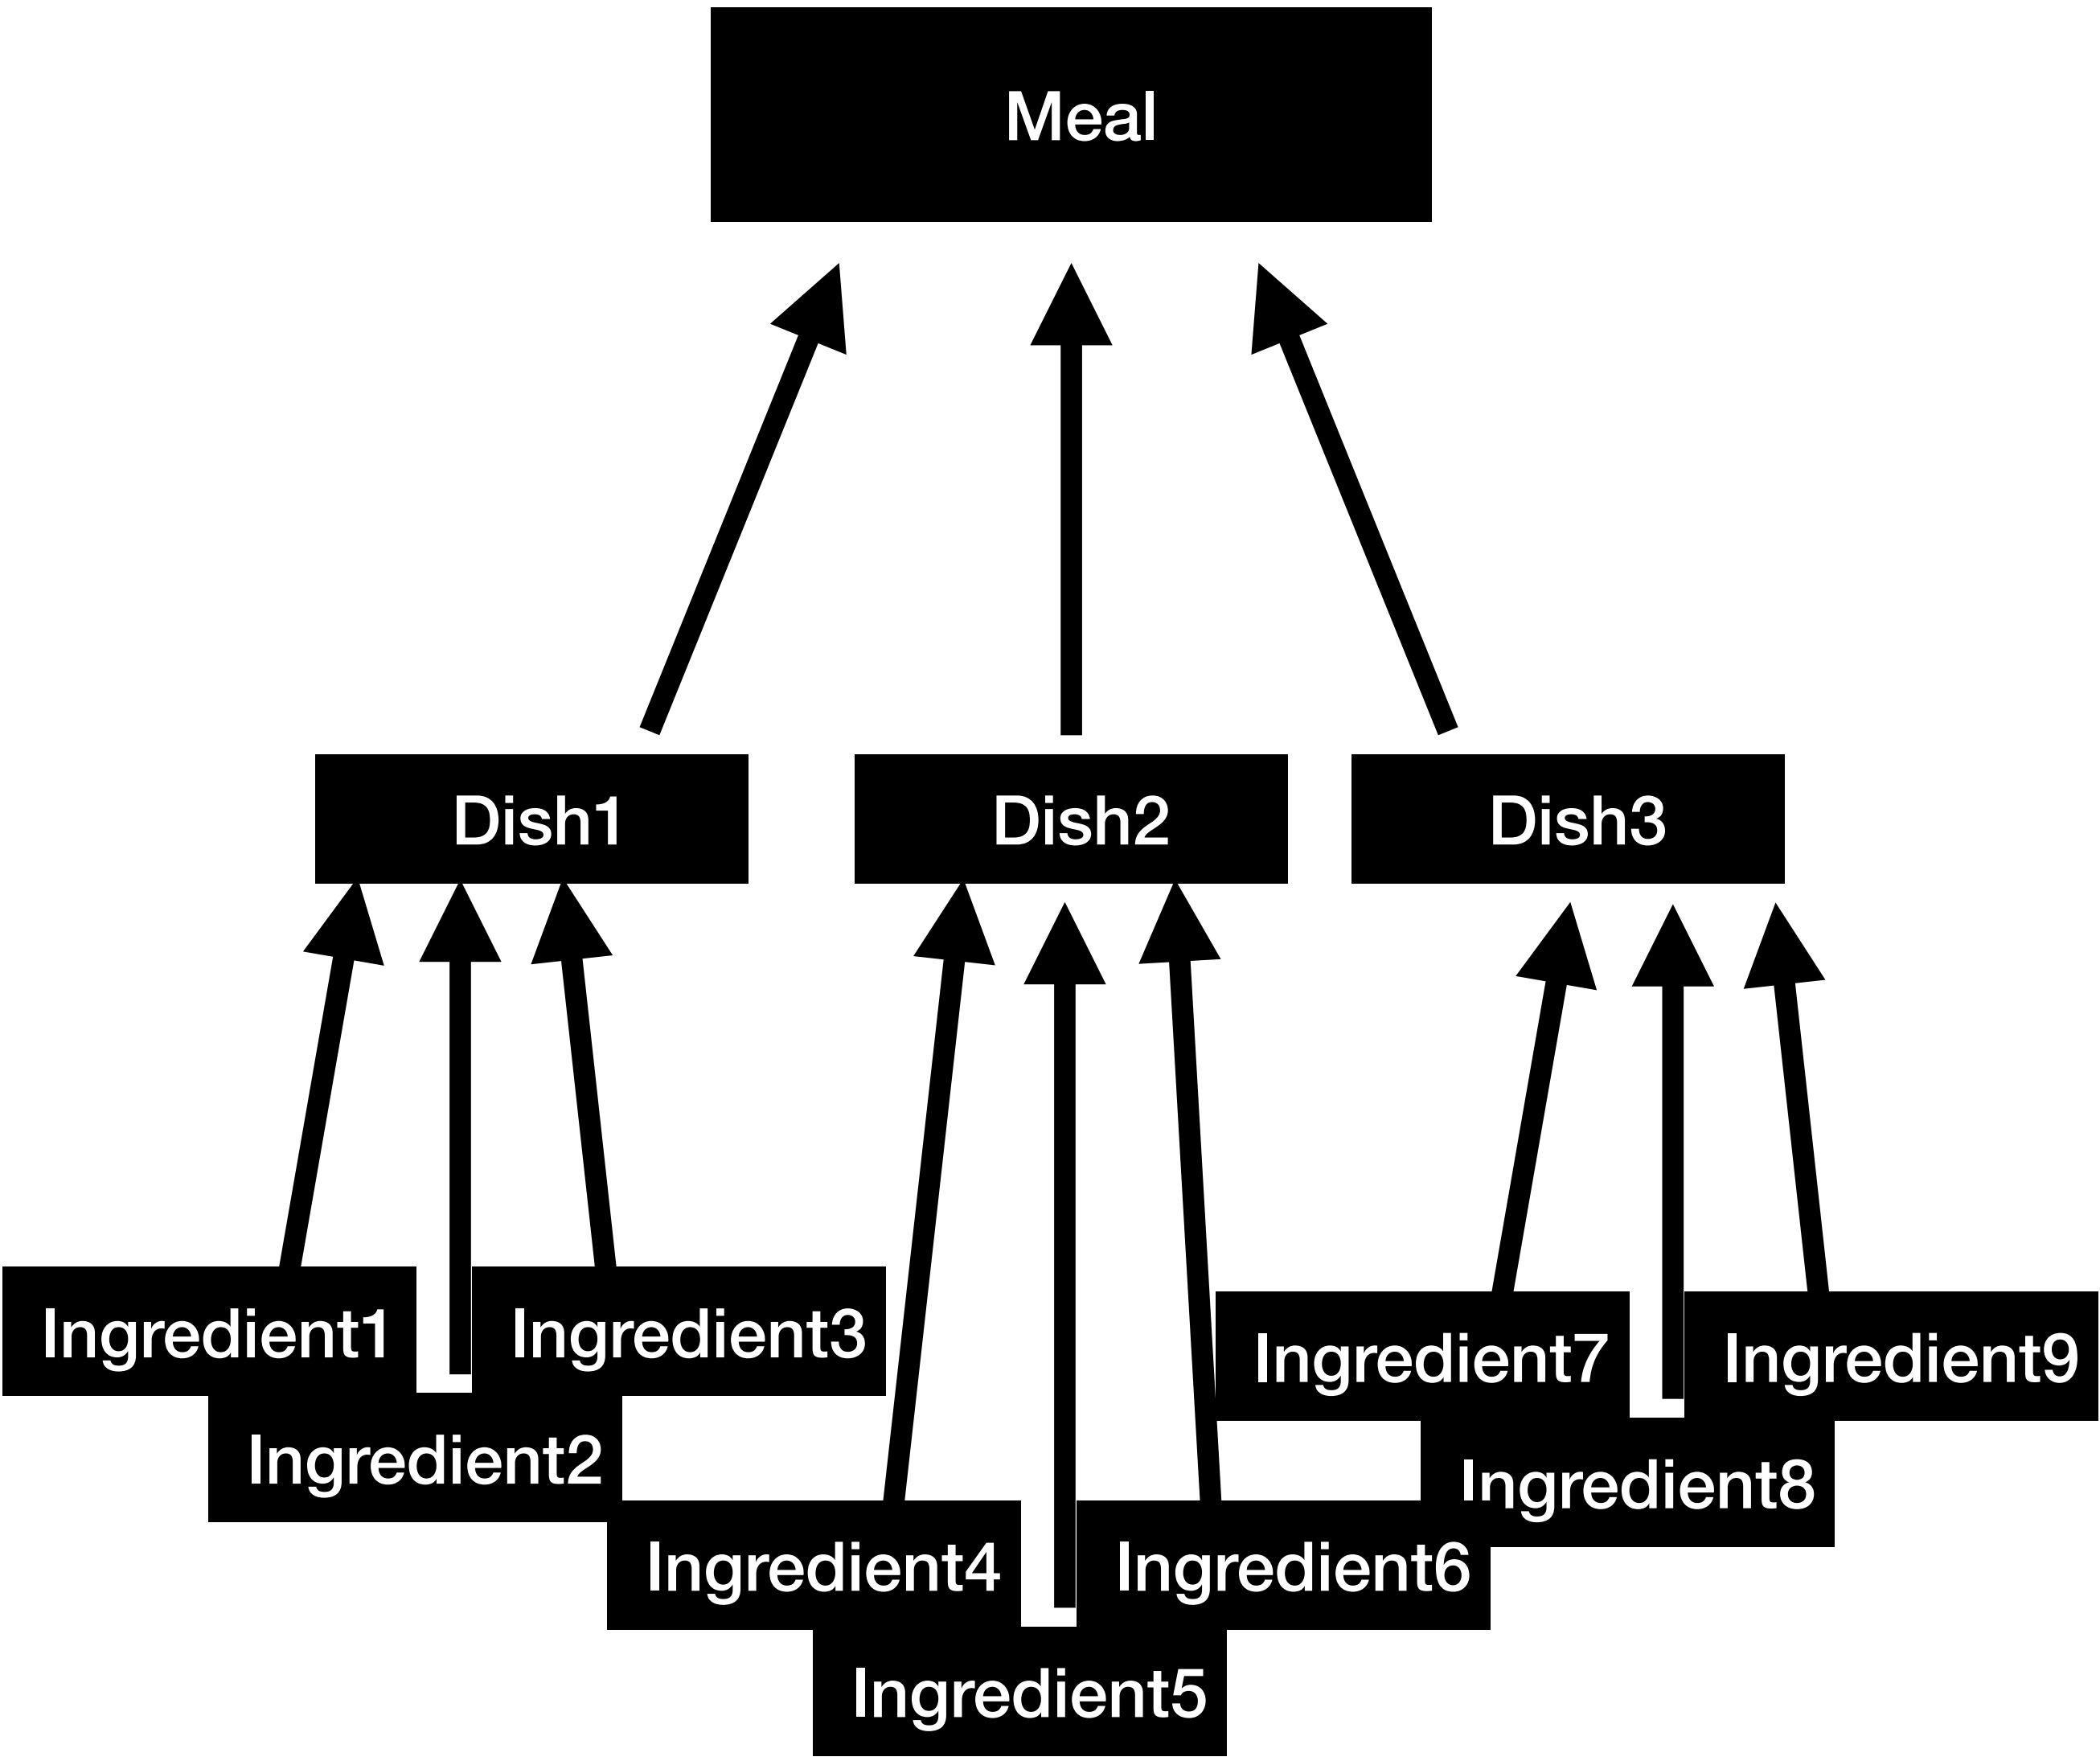

Multiple sets of steps

- Recipes can depend on each other
 - Recipe for making cardamon rice
 - Recipe for making curry paste
 - Recipe for roasting carrots
- Combine these
- Curry ingredients are cardamon rice, curry paste, and roasted carrots
- Cardamon rice ingredients are cardamon, water, salt, and jasmine rice
- Curry paste ingredients are onions and curry
- Roasted carrots ingredients are carrots, pepper, and olive oil

See this as a graph for inputs and outputs with multiple layers

Makefile

- target
 - Example: researchPaper.html
- dependencies
 - Example: introduction.md, graph.pdf, etc
- Steps/processes
 - Example: `convert graph.pdf graph.png;`
`pandoc introduction.md -f markdown -t html`
`-o researchPaper.html`
